Projects

Plags Checker | *JavaScript, React.js, Tailwind CSS, Node.js, Vitest* | Live Demo | Source Code — *Jul 2026*

- Engineered a C++ similarity engine using lexical tokenization, normalization, n-grams, and JavaScript.
- Applied winnowing fingerprints and weighted scoring to detect renaming, dead code, and statement reordering.
- Created Vitest benchmarks to validate detection across source-code transformations and distinct algorithms.

AI Chatbot | *React.js, Node.js, Express.js, MongoDB, Gemini API, Tailwind* | Live Demo | Source Code — *May 2026*

- Developed a MERN AI chat platform with REST APIs, and user-specific chat management.
- Integrated Gemini API with Markdown and code-block rendering to deliver structured AI responses.
- Implemented JWT authentication, HTTP cookies, middleware to secure backend routes.

Developer Portfolio | *React.js, Express.js, REST APIs, Framer Motion* | Live Demo | Source Code — *May 2026*

- Designed a full-stack portfolio using React, Express.js, MongoDB, and REST APIs.
- Implemented cached APIs for live LeetCode and Codeforces statistics with automated data synchronization.
- Engineered reusable React components with dynamic responsive design and Framer Motion animations.
